

Assembly and production

Born as a small production laboratory in the early 1980s, ZAVI SRL grew over time in the reference market until 1995 when it became a joint-stock company (SRL).

In the early 2000s we moved to the new production site, with 600 m2 available for production and a turnover of around 2,500,000-3,000,000 euros.

In 20129, we expanded the production space and can now operate in 1200 m2.

Cable process

ZAVI SRL

Advantages of Internal Production

The advantage of Internal Production concerns control, efficiency and sustainability.

Production Services

Production of opening coils, low voltage switches, undervoltage releases, auxiliary contacts, connection cable groups, connection card groups and executions to customer specifications.

General informations

In 2022, we have over 5,000,000 turnover and export throughout Europe, US and China. We can mass produce PLC, AWL and UL marked cables for the North American market.

Assembly Services

Our assembly services cover all electrical engineering and low voltage electronics, without excluding preventive maintenance.

We have been ISO9001:2013 and ISO14001:2013 certified since 1995. We operate in compliance with the European ROHS/REACH, TSCA regulations and adhere to the Conflict Mineral Policy (download the free download form to join: www.zavisrl.com)
